K9 Vehicle Temperature Safety & Security System with Remote Door Pop

K9Safety™ has the most comprehensive safety and security systems for your K9 vehicle available today. We have improved our patented K9 safety features and added new capabilities to bring you the best solution possible.

With over 14 years experience in this industry, we have a proven track record in delivering quality products to professional K9 handlers in hundreds of First Responder agencies across the continent.

Window Drop Module Controls two windows roll down upon alert temperature. This is included with the Pro Kit.

Our new system is a fully functional anti-theft system with the convenience of remote door lock and unlock, trunk release and the security of intrusion detection and alerting.

Compact Alarm Siren. This is included with the

Optional 10" High Performance Window Fan Kit.

Two-Way Window Antenna

The Two-Way remote allows the user to transmit startup, system on/off, door lock/unlock, trunk pop signals and more at up to 1000ft from the vehicle. It also allows the user to receive status, alert, and alarm signals up to 2000ft from the vehicle. This is included with the Pro Kit.

Two-Way Remote Transmitter

K9Caller™ Main Control Unit
This is the heart of our new system. It is a microprocessor control interface that manages operations for engine startup and run, temperature and alarm alerts, and remote door pop. This is included with all K9Caller kits.
